Basic HTML Tags

### Instruction

In this practice session, we are going to practice using the ul, ol and li tags in HTML to create different types of lists on a webpage.

1. We've already done a bit of a setup for you by adding some scaffolding code for you. You can start working directly inside the body element.
2. Start by creating a ul tag inside the body element. This list will contain names of fruits. Add 5 list items inside the list - Apple, Banana, Cherry, Watermelon and Grapes.

```
<ul>
  <li>Apple</li>
  <li>Banana</li>
  <li>Cherry</li>
  <li>Watermelon</li>
  <li>Grapes</li>
</ul>
```

3. Let's add another list, but this time, use the ol tag to create an ordered list.

```
<ol>
  <li>Apple</li>
  <li>Banana</li>
  <li>Cherry</li>
  <li>Watermelon</li>
  <li>Grapes</li>
</ol>
```

4. Your completed code should look like this:

```
<body>
  <ul>
    <li>Apple</li>
    <li>Banana</li>
    <li>Cherry</li>
    <li>Watermelon</li>
    <li>Grapes</li>
  </ul>
  <ol>
    <li>Apple</li>
    <li>Banana</li>
    <li>Cherry</li>
    <li>Watermelon</li>
    <li>Grapes</li>
  </ol>
</body>
```
